CLOSED CHAIN EXERCISES ON FLOOR (WEIGHT TRANSFERENCE, CRAWLING, BEAR CRAWLS ETC)

COMBINATION LOADING (easy band to start with) – variation is the key!

PRONE SCAPULAR RETRACTION EXERCISES

PRONE 'Y' EXERCISE

Feel your shoulder blades pull in and down with these 3 different exercises done whilst lying on your stomach. Vary the times you hold your arms in the air.

COORDINATION / PROPRIOCEPTION DRILLS

Bounce, catch and throw a ball in different positions. Only do what you're comfortable doing, ensuring no feelings of instability. Do under controlled conditions. Please don't progress drills too quickly. Must remain symptom-free.

PUSH-UP PLUS

Do a Push-up. Once your elbows are straight, continue to press your palms into the floor and drive the middle part of your spine towards the ceiling. Repeat. Make it easier by doing it off your knees.

STATIC DOWNS (Time Under Tension)

Adopt the push-up position (off your feet or knees). Lower your body towards the ground until you find the spot in the middle of the movement where your arms start to shake ('the tremor of truth'). Hold this position for the prescribed amount of time.

DIVERS (HALF HINDUS)

Start in the 'A' Frame position as shown. Move your body down and forward like you're ducking through a gap under a fence. To make the exercise easier, don't duck as low. Finish with hips low and shoulders high.
